SMARTER HIRING

## Smarter Employment Decisions

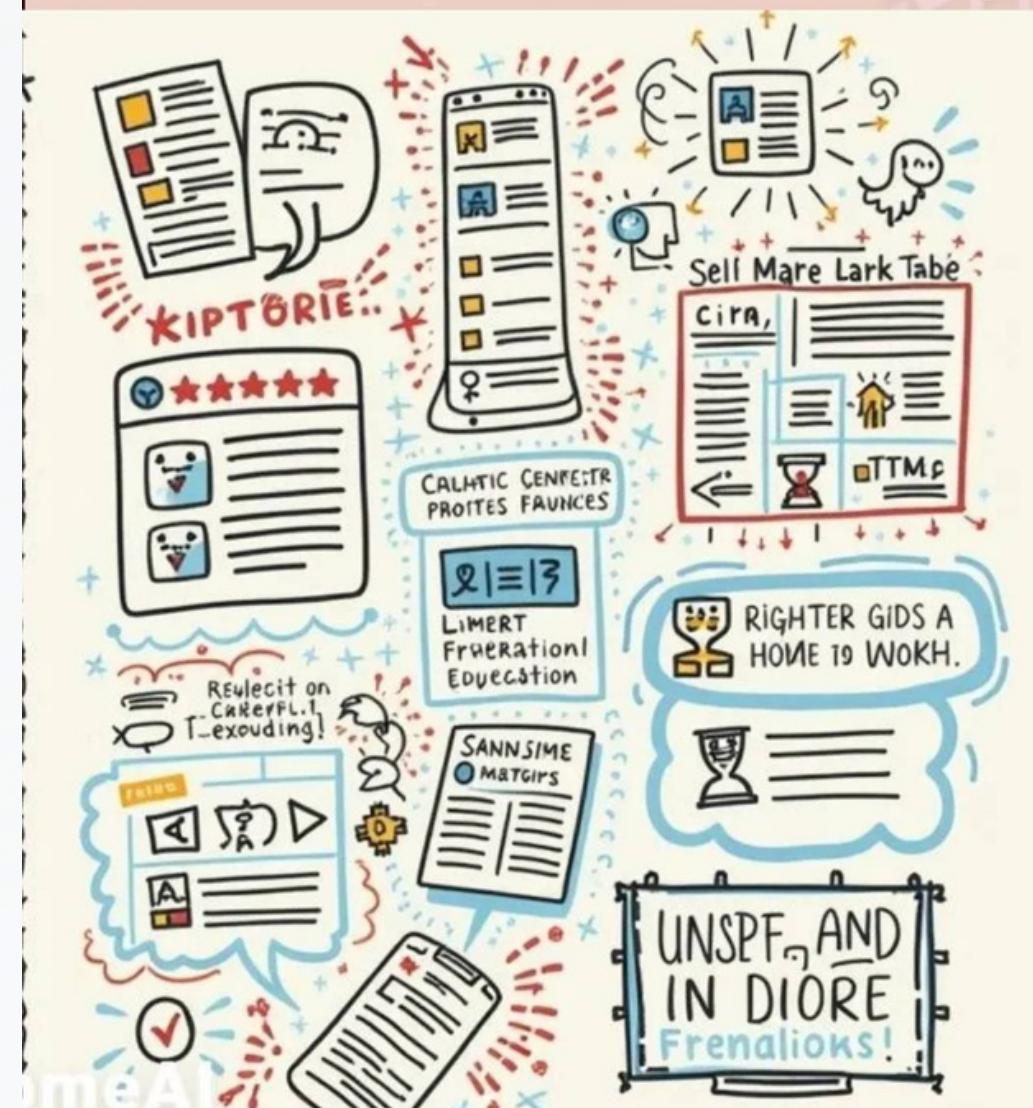

# PROJECT OVERVIEW

## Verified Insights for Smarter Hiring

### Content:

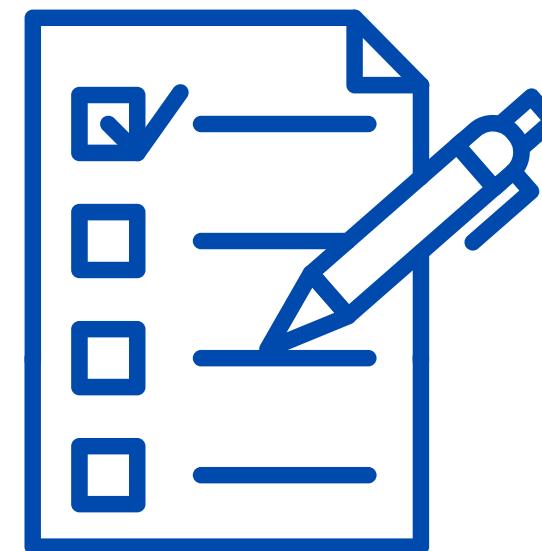

- Problem: Employment platforms like LinkedIn and Indeed rely on self-praise, offering biased or incomplete information about companies and candidates.
- Solution: Insight Scope delivers verified, insights on companies and employees, empowering job seekers and employers to make data-driven decisions.
- Value Proposition: Revolutionizes hiring and job-seeking with transparent, reliable feedback.

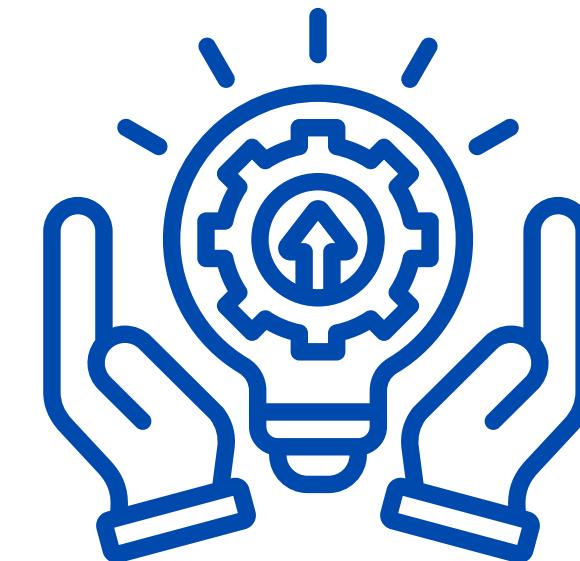

# Gap analysis

Current State  
(Before InsightScope)

Identified Gap

Desired Future State  
(After InsightScope)

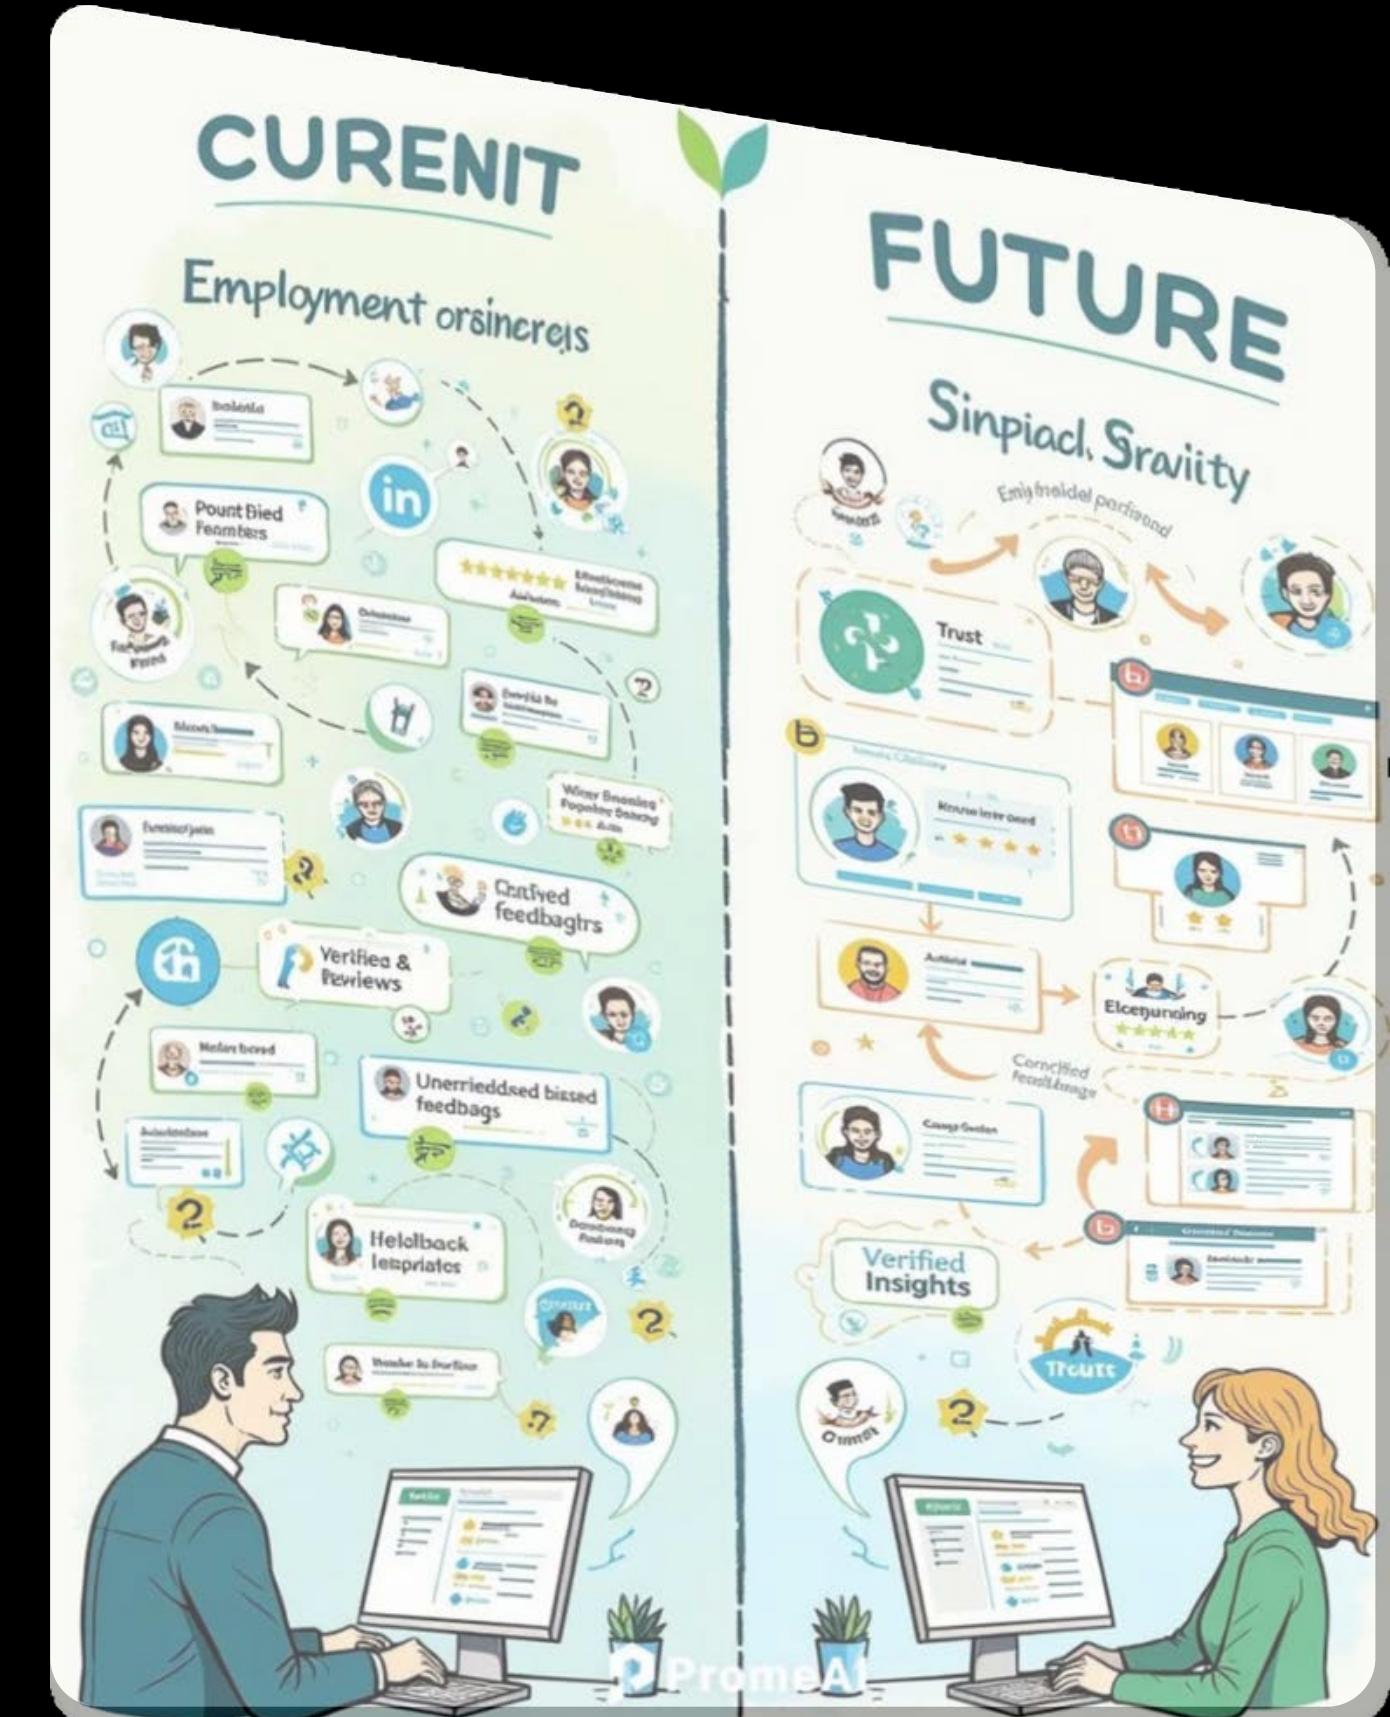

# Gap analysis

# Current State (Before InsightScope)

# The Problem with Current Platforms

- **Unverified Reviews:** Feedback on platforms like LinkedIn is often biased, manipulated, or inaccurate.
  - **Lack of Transparency:** Job seekers and employers can't trust the data, leading to poor decisions.
  - **Impact:** Employers make bad hires, and job seekers end up in unsuitable places.
  - **Turning to Unreliable Sources:** For real information, users often turn to unprofessional platforms like Facebook, which are full of unverified claims and misleading content.

# Gap analysis

## Identified Gap

- No Real-Time Feedback: No platform offers verified, multi-source feedback integrated into job search platforms.
- Users Need Trustworthy Data: Both job seekers and employers lack reliable tools to trust the information they're seeing.
- Mismatched Decisions: Job seekers fall into unsuitable roles, and employers are misled by overrated resumes. InsightScope closes this gap by providing verified, trustworthy insights, making the job market more transparent.
- Critical Need: Without verified insights, companies and candidates continue making decisions based on incomplete or false information.

# Gap analysis

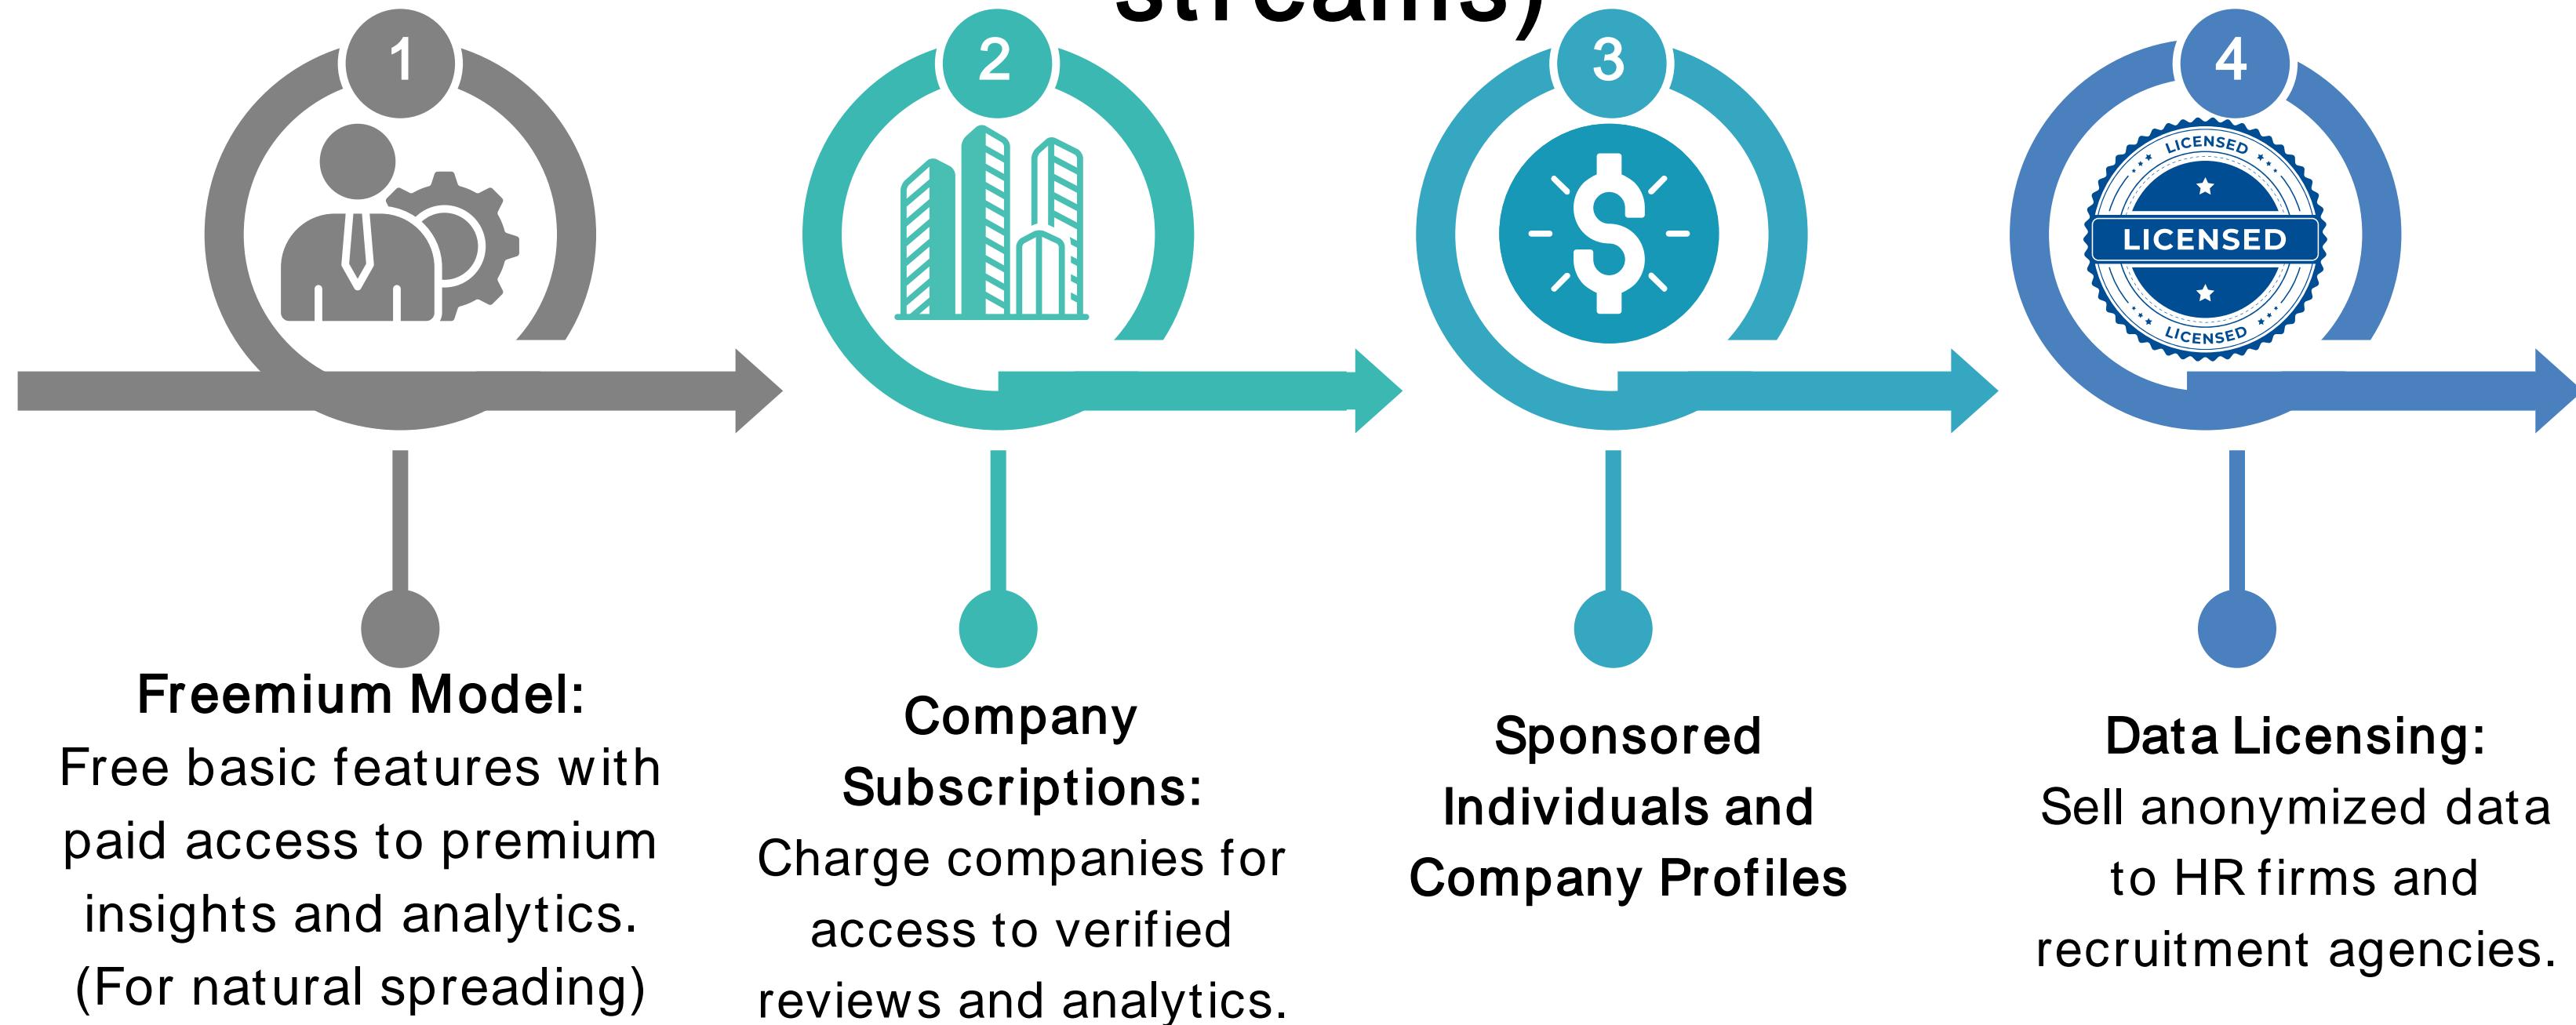

## Desired Future State (After InsightScope)

- **Verified Feedback System:** Multi-source, real-time verified insights for job seekers and employers.
- **Basic Insights Without Leaving the Platform:** Users get instant, verified feedback while browsing on LinkedIn and Indeed, without needing to switch platforms.
- **Improved Decision-Making:** Insight Scope enables better hiring decisions and higher job satisfaction by offering trusted data.
- **Seamless Integration:** Insight Scope works directly on LinkedIn and Indeed, offering feedback without disruption.

# Business Model (Revenue streams)

# PROJECT CHARTER

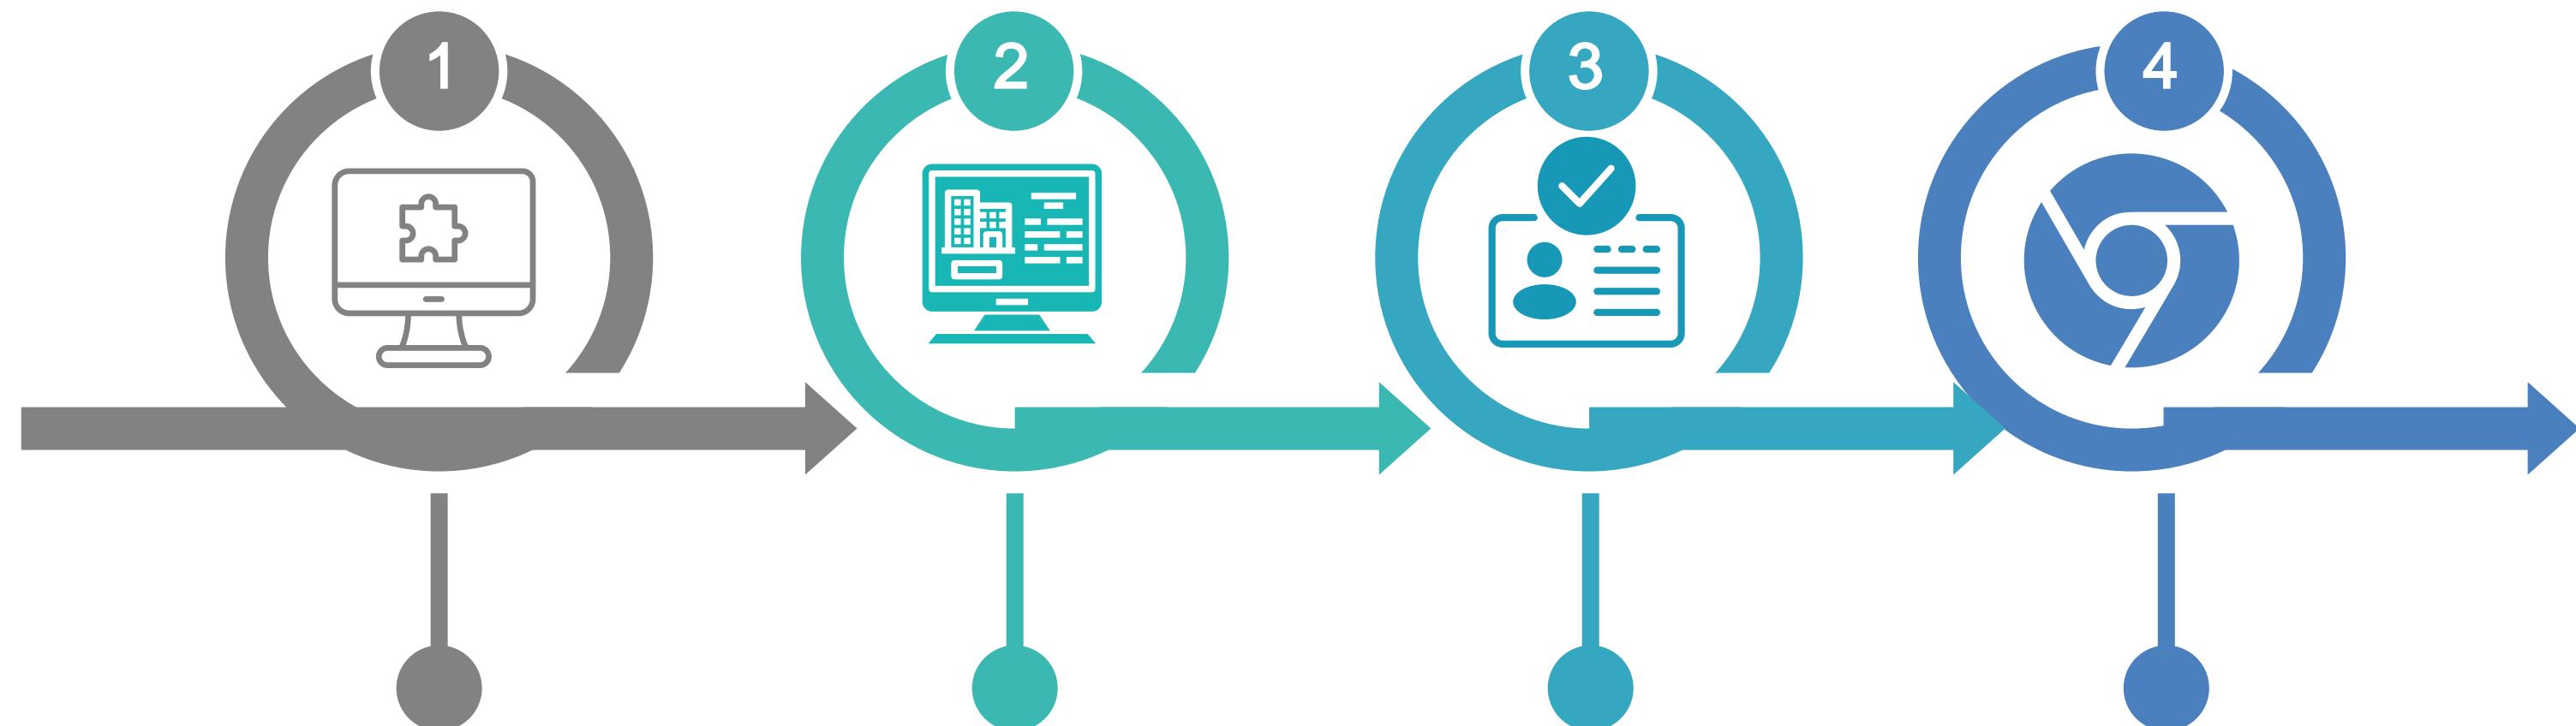

## Objective

- 01 Develop a browser extension compatible with LinkedIn, Indeed, and other employment websites.
- 02 Create a website to host profiles for companies and employees, providing insights through verified feedback.
- 03 Launch a feedback system for companies and employees, verified by Multiple data points to ensure fairness.
- 04 Successfully targeted companies in Egypt for a soft launch, focusing on established, larger organizations.

# PROJECT CHARTER

## High-Level Requirements

The browser extension must integrate seamlessly with LinkedIn, Indeed, and other employment platforms.

The website must support detailed profiles for companies and employees, and display verified feedback.

A moderation and verification system must be in place to prevent biased feedback.

The platform must ensure cross-browser compatibility and support all major browsers (Chrome, Firefox, Safari, etc.).

# Project Manager and Authority Level

**AYMAN IDRIS**  
**PROJECT**  
**MANAGER**

## Authority Level

coordinates teams, manages risks, and ensures timelines are met. They have the authority to assign tasks, manage resources, and approve changes throughout the project.

## Summary Milestone Schedule

### MONTH 1

Finalize project requirements and gather user stories. Begin design work for the extension and website.

### MONTHS 2-3

Full development of the browser extension, feedback system, and website.

### MONTH 4

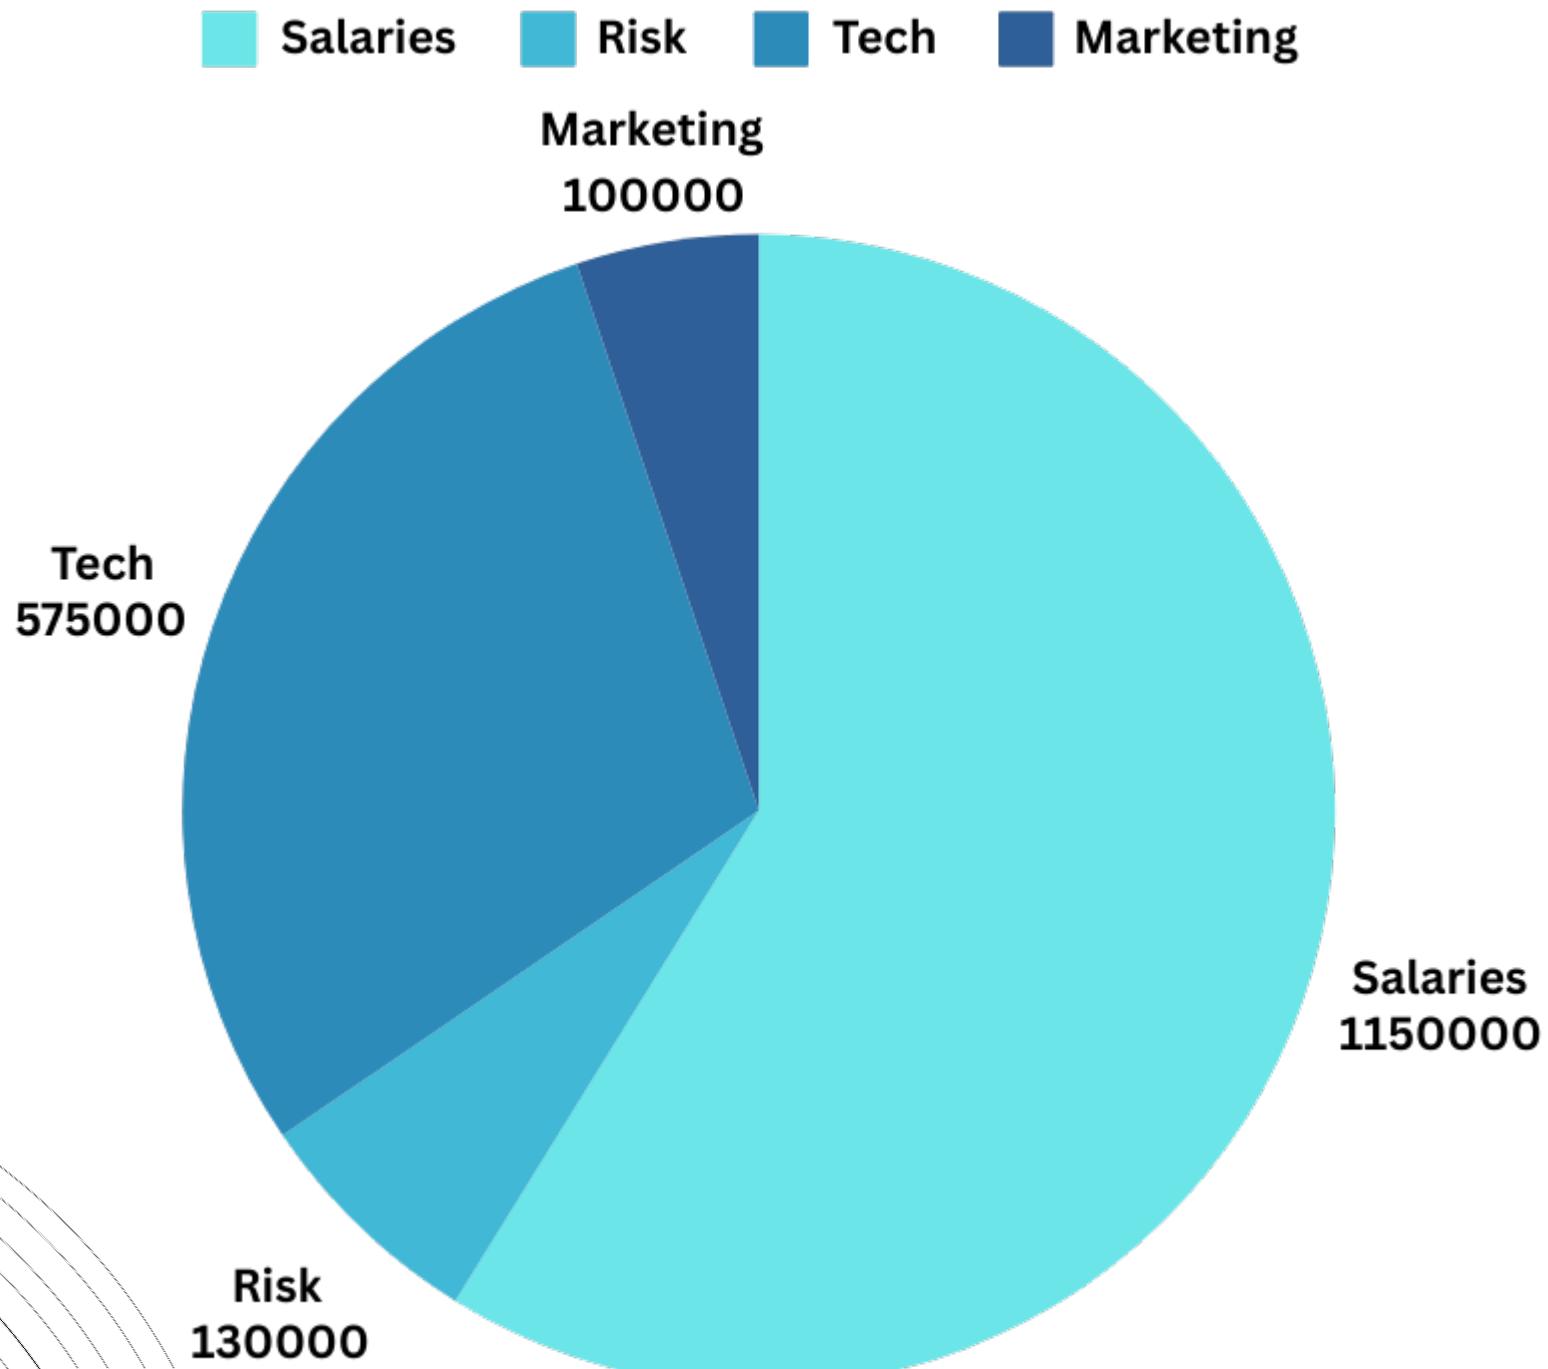

Testing, quality assurance, and GDPR compliance checks. Execute the soft launch with key companies in Egypt..

# PROJECT CHARTER

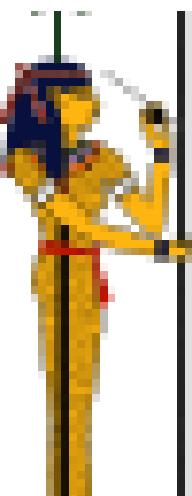

## SUMMARY BUDGET

Total Project Budget

EGP 1,610,000 - 1,955,000

**Sponsor:** Ministry of Communications  
and Information Technology

**Ministry of Communications  
and Information Technology**

## Ministry of Communications and Information Technology

Government , Sponsor , Successful delivery and alignment with national objectives

## 02 Job Seekers

LinkedIn/indeed users , - Transparent, reliable, and verified feedback - Company insights, feedback transparency

## 03 Companies

LinkedIn/indeed users - Verified feedback on potential employees - Employee insights, feedback accuracy

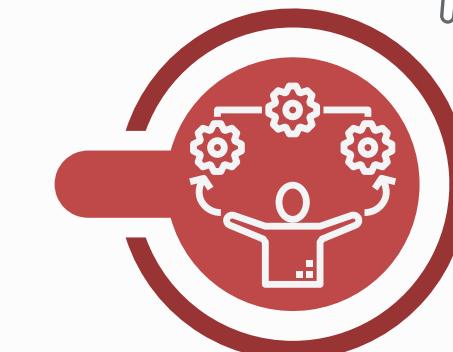

## 04 Product owner

Project Team - Ensure product backlog is prioritized and aligned with project goals.  
- Backlog refinement, sprint planning, and user story clarification.

## 05 Project Manager

Project Team - (scrum master) - Delivery within scope, budget, and schedule - Planning, execution, risk management

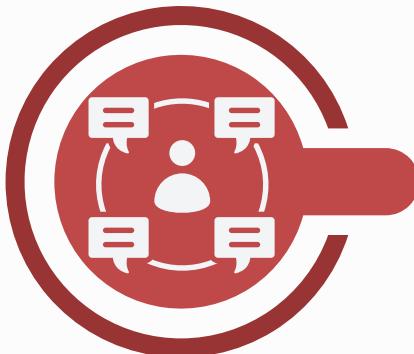

# STAKEHOLDERS REGISTER

## Moderation & Marketing Team 06

Moderators/ Marketing & User Acquisition Specialists - Efficient tools to manage biased or malicious feedback / Clear guidance on features, promotional resources

## Testing Team 07

QA Engineers - Access to development environment for thorough testing - System functionality and performance

## Development Team 08

Developers,Engineers,UX/UIDesigners  
Transparent,reliable, and verified feedback- Extension and website development

## Target Companies in Egypt 09

I.T and Tech. companies in Egypt -Pilot participants - Usable system with accurate insights on employee feedback - Usability and feedback accuracy

## Browser Extension Platforms 10

Chrome, Firefox, Safari - Platform providers - Secure and compatible extension - Platform security and performance

A man with a beard and long hair is shown from the chest up, looking directly at the camera with a weary expression. He has his hands on his temples, suggesting stress or headache. In front of him, several hands are visible, each holding a different electronic device: a smartphone, a tablet, a laptop, and a large monitor. The background is blurred, showing what appears to be an office environment. The overall mood is one of being overwhelmed by technology and work.

# Product Backlog

# PRODUCT BACKLOG

Priority	User Story	Description	Acceptance Criteria	Effort Estimate (Story Points)	Notes/Dependencies
High	As a user, I want to see verified feedback on companies so that I can make informed decisions.	Display detailed feedback on company culture, work environment, and employee satisfaction.	- Verified feedback is visible. - Feedback validated from multiple sources.	8 Story Points	Requires feedback collection and verification system.
High	As a company, I want access to verified feedback on potential employees to evaluate candidates better.	Show achievements and reviews from prior employers to help companies with hiring decisions.	- Employee reviews are verified and displayed. - System prevents biased or malicious reviews.	5 Story Points	Depends on robust verification system development.
High	As a user, I want the browser extension to work on LinkedIn and Indeed for easy feedback access.	Browser extension provides direct feedback when visiting company profiles on employment platforms.	- Extension works on LinkedIn and Indeed. - Cross-browser compatibility (Chrome, Firefox, Safari).	13 Story Points	Requires platform API integration and cross-browser testing.
Medium	As a company, I want a dashboard with feedback analytics to track my company's reputation.	Dashboard shows key metrics like employee satisfaction and work culture feedback.	- Functional dashboard with filters for viewing feedback. - Feedback metrics displayed in a clear format.	8 Story Points	Requires feedback system and data structure in place.
Medium	As a user, I want to receive notifications on new feedback so I can stay updated.	Users are notified when there is new feedback on companies they follow.	- Notifications trigger for new feedback. - Customizable notification settings for users.	3 Story Points	Requires integration with feedback system and user accounts.
Medium	As a user, I want to create a profile to manage my feedback and preferences.	Users can create and manage profiles for feedback interaction and notifications.	- Users can create, edit, and view their profiles. - Secure login and authentication system.	8 Story Points	User management and authentication system required.

# PRODUCT BACKLOG

Priority	User Story	Description	Acceptance Criteria	Effort Estimate (Story Points)	Notes/Dependencies
Medium	As a company, I want to log in and manage feedback so I can respond to employee reviews.	Companies can create profiles to view and manage feedback related to them.	- Companies can manage their profiles and feedback. - Companies can update basic information.	5 Story Points	Requires completion of user authentication and profile system.
Low	As a company, I want to respond to feedback publicly to address concerns and improve transparency.	Companies can respond to employee feedback on the platform.	- Moderated company responses are displayed alongside reviews. - Response system is easy to use.	5 Story Points	Moderation system needed for feedback responses.
Low	As a user, I want to filter feedback by specific categories to find relevant information more easily.	Users can filter feedback by categories such as work environment, management, and compensation.	- Feedback filtering works properly for all categories. - Categories are clearly defined and relevant.	4 Story Points	Requires feedback categorization structure.
Low	As a user, I want to share feedback and profiles with others via social media or email.	Users can share company profiles or specific feedback on social media platforms or via email.	- Shareable links available for feedback and profiles. - Integration with social media platforms.	3 Story Points	Social media and email sharing integration needed.
Low	As the product grows, I want the platform to handle more users without performance issues for scalability.	Optimize the system to handle increasing numbers of users and feedback without performance degradation.	- System scales efficiently under load. - No performance bottlenecks under high traffic.	8 Story Points	Requires load testing and backend optimization.

# EPIC GRAPH

## Insight Scope

### Feedback System

1-user,verified feedback on companies  
2-company,verified feedback on potential employees.  
3-user,browser extension to work on LinkedIn.

### User Profiles

1-user,create a profile  
2-company,respond to employee reviews.  
3-company,track my company's reputation.

### Notifications

1-user, receive notifications on new feedback  
2-company, respond to feedback  
3-user,filter feedback

### Feedback Sharing

1- user, share feedback and profiles  
2-handle more users

# SPRINT PLANNING

# SPRINT 01 OVERVIEW

## Sprint Duration (2 weeks)

Start date: 12/09/24

End date: 03/10/24

## Deliverables

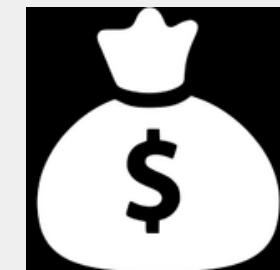

### Feedback System

#### user stories:

- Verified feedback on companies
- access to verified feedback on potential employees.
- the browser extension to work on LinkedIn for easy feedback access.

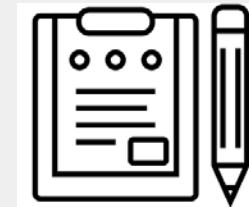

## Cost

395,000 EGP

# GHANT CHART BASELINE

# Risk Assessment Matrix for InsightScope

Risk ID	Risk Description	Likelihood (Low/Medium/High)	Impact (Low/Medium/High)	Risk Level (Priority)	Mitigation Strategy	Owner
R1	<b>API Access Restriction:</b> LinkedIn or Indeed restricts or revokes API access, affecting core functionalities of the browser extension.	High	High	High	Establish early partnerships with LinkedIn and Indeed; develop alternative data collection methods.	Development Team
R2	<b>Data Privacy Compliance:</b> Failure to comply with GDPR or other privacy laws while handling sensitive employee and company data.	Medium	High	High	Conduct regular data privacy audits; ensure full compliance with GDPR and implement strong data encryption.	Legal/Compliance Team
R3	<b>Delayed API Integration:</b> Technical challenges cause delays in integrating with employment platforms (LinkedIn, Indeed).	Medium	Medium	Medium	Allocate additional time in the project schedule for integration testing; hire experienced API developers.	Development Team
R4	<b>Scalability Issues:</b> The platform struggles with performance as user numbers increase, causing slow loading times and crashes.	Medium	High	High	Perform continuous load testing and backend optimization; allocate extra server resources to handle increased traffic.	Development and Infrastructure Team
R5	<b>User Adoption Resistance:</b> Job seekers or employers are reluctant to adopt InsightScope, sticking to existing platforms like Glassdoor or Indeed reviews.	Medium	Medium	Medium	Aggressive marketing and outreach to educate users on the advantages of verified insights; partner with key influencers.	Marketing Team
R6	<b>Budget Overrun:</b> Unforeseen costs cause the project to exceed its planned budget.	Medium	High	High	Regular financial monitoring; build a contingency fund of 10-15%; reallocate resources efficiently.	Project Manager
R7	<b>Security Breach:</b> A potential hack or data breach exposes sensitive user data, damaging the company's reputation.	Low	High	High	Implement multi-layered security protocols; conduct regular security audits; quickly patch vulnerabilities.	IT/Security Team
R8	<b>Technical Debt:</b> Accumulation of unresolved technical issues (bugs, outdated systems) leads to increased maintenance and reduced performance.	Medium	Medium	Medium	Regular refactoring of code; periodic sprint reviews focused on resolving technical debt; maintain robust documentation.	Development Team

# Daily Standup Report

Date: 26-9-2024

Project: InsightScope

## Attendees

Product Manager (PM)

UI/UX Designer

Front-end Developer

Backend Developer

Quality Assurance (QA)

Quality Control (QC)

# Updates

## 1. Product Manager (PM)

- \* Yesterday: Finalized user stories for the next sprint and conducted a stakeholder meeting.
- \* Today: Will prioritize the backlog and review feedback from the team.
- \* Blockers: Awaiting final approval on user stories from stakeholders

## 2. UI/UX Designer

- \* Yesterday: Completed wireframes for the new feature and started creating high-fidelity mockups.
- \* Today: Will present mockups to the team for feedback and make necessary adjustments.
- \* Blockers: Need clarification on some user requirements from the PM.

## 3. Front-end Developer

- \* Yesterday: Integrated the new design into the application and fixed a few bugs in the existing codebase.
- \* Today: Will start implementing responsive design for mobile devices.
- \* Blockers: Encountering issues with cross-browser compatibility.

# Updates

## 4. Backend Developer

- \* Yesterday: Set up the database schema for the new feature and created API endpoints.
- \* Today: Will work on connecting the API with the front-end and writing tests for the endpoints.
  - \* Blockers: Need assistance with API documentation.

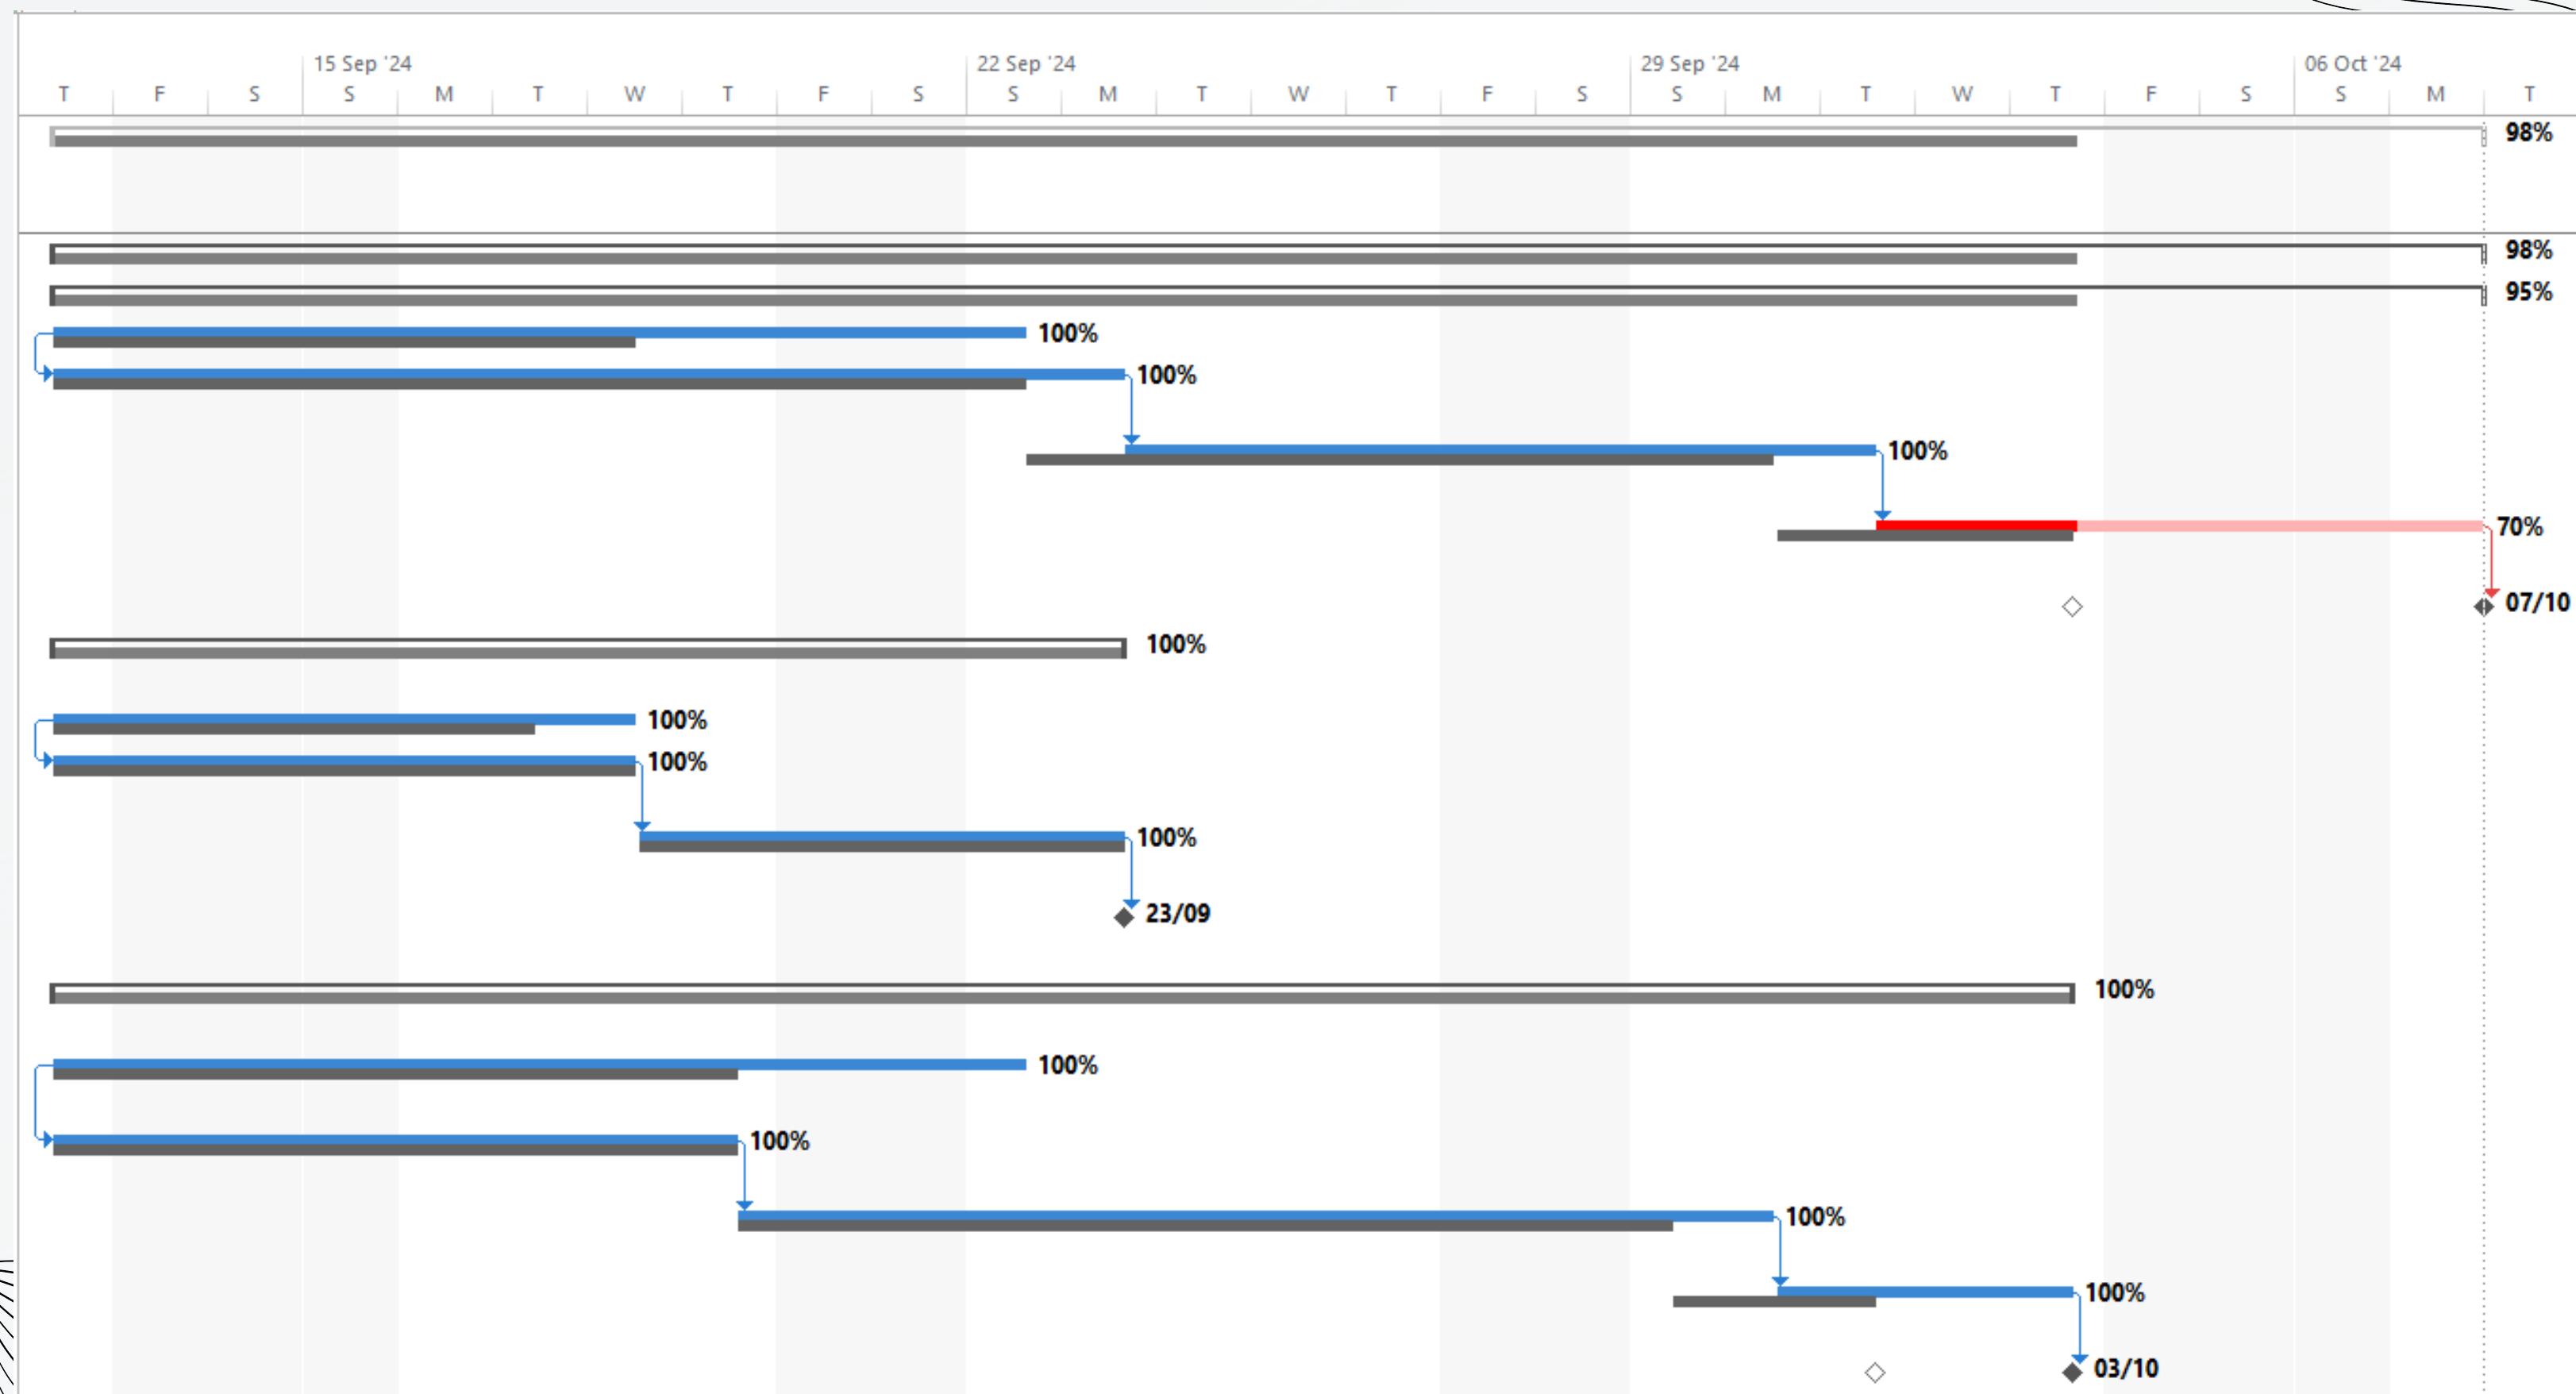

## 5. Quality Assurance (QA)

- \* Yesterday: Conducted initial testing on the latest build and reported bugs to the dev team.
- \* Today: Will continue testing new features and prepare a test plan for the upcoming release.
- \* Blockers: Some critical bugs need immediate attention from developers.

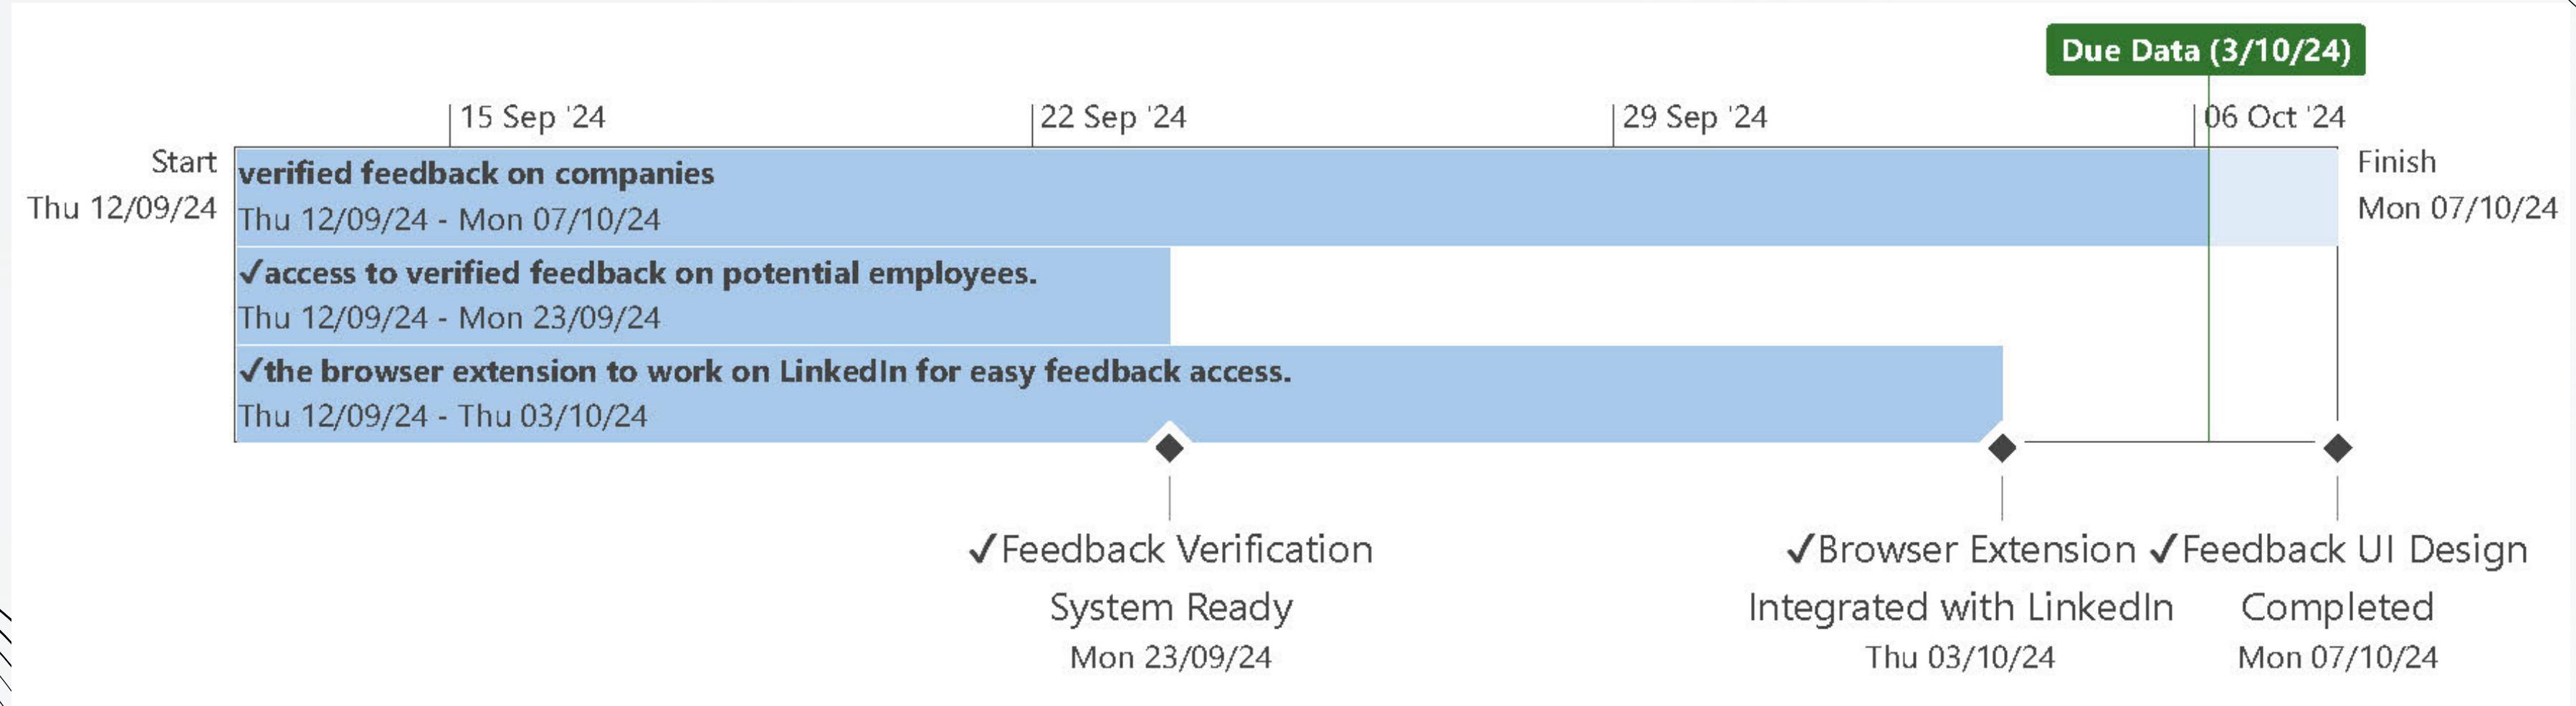

## 6. Quality Control (QC)

- \* Yesterday: Reviewed test cases and documentation to ensure compliance with standards.
- \* Today: Will perform a quality review of the current build and provide feedback to the team.
- \* Blockers: None at this time.

Name	Actual Cost	Remaining Cost	Baseline Cost	Cost	Cost Variance
SPRINT 1: CORE FEATURES	430,875.00 ج.م.	0.00 ج.م.	395,625.00 ج.م.	430,875.00 ج.م.	35,250.00 ج.م.

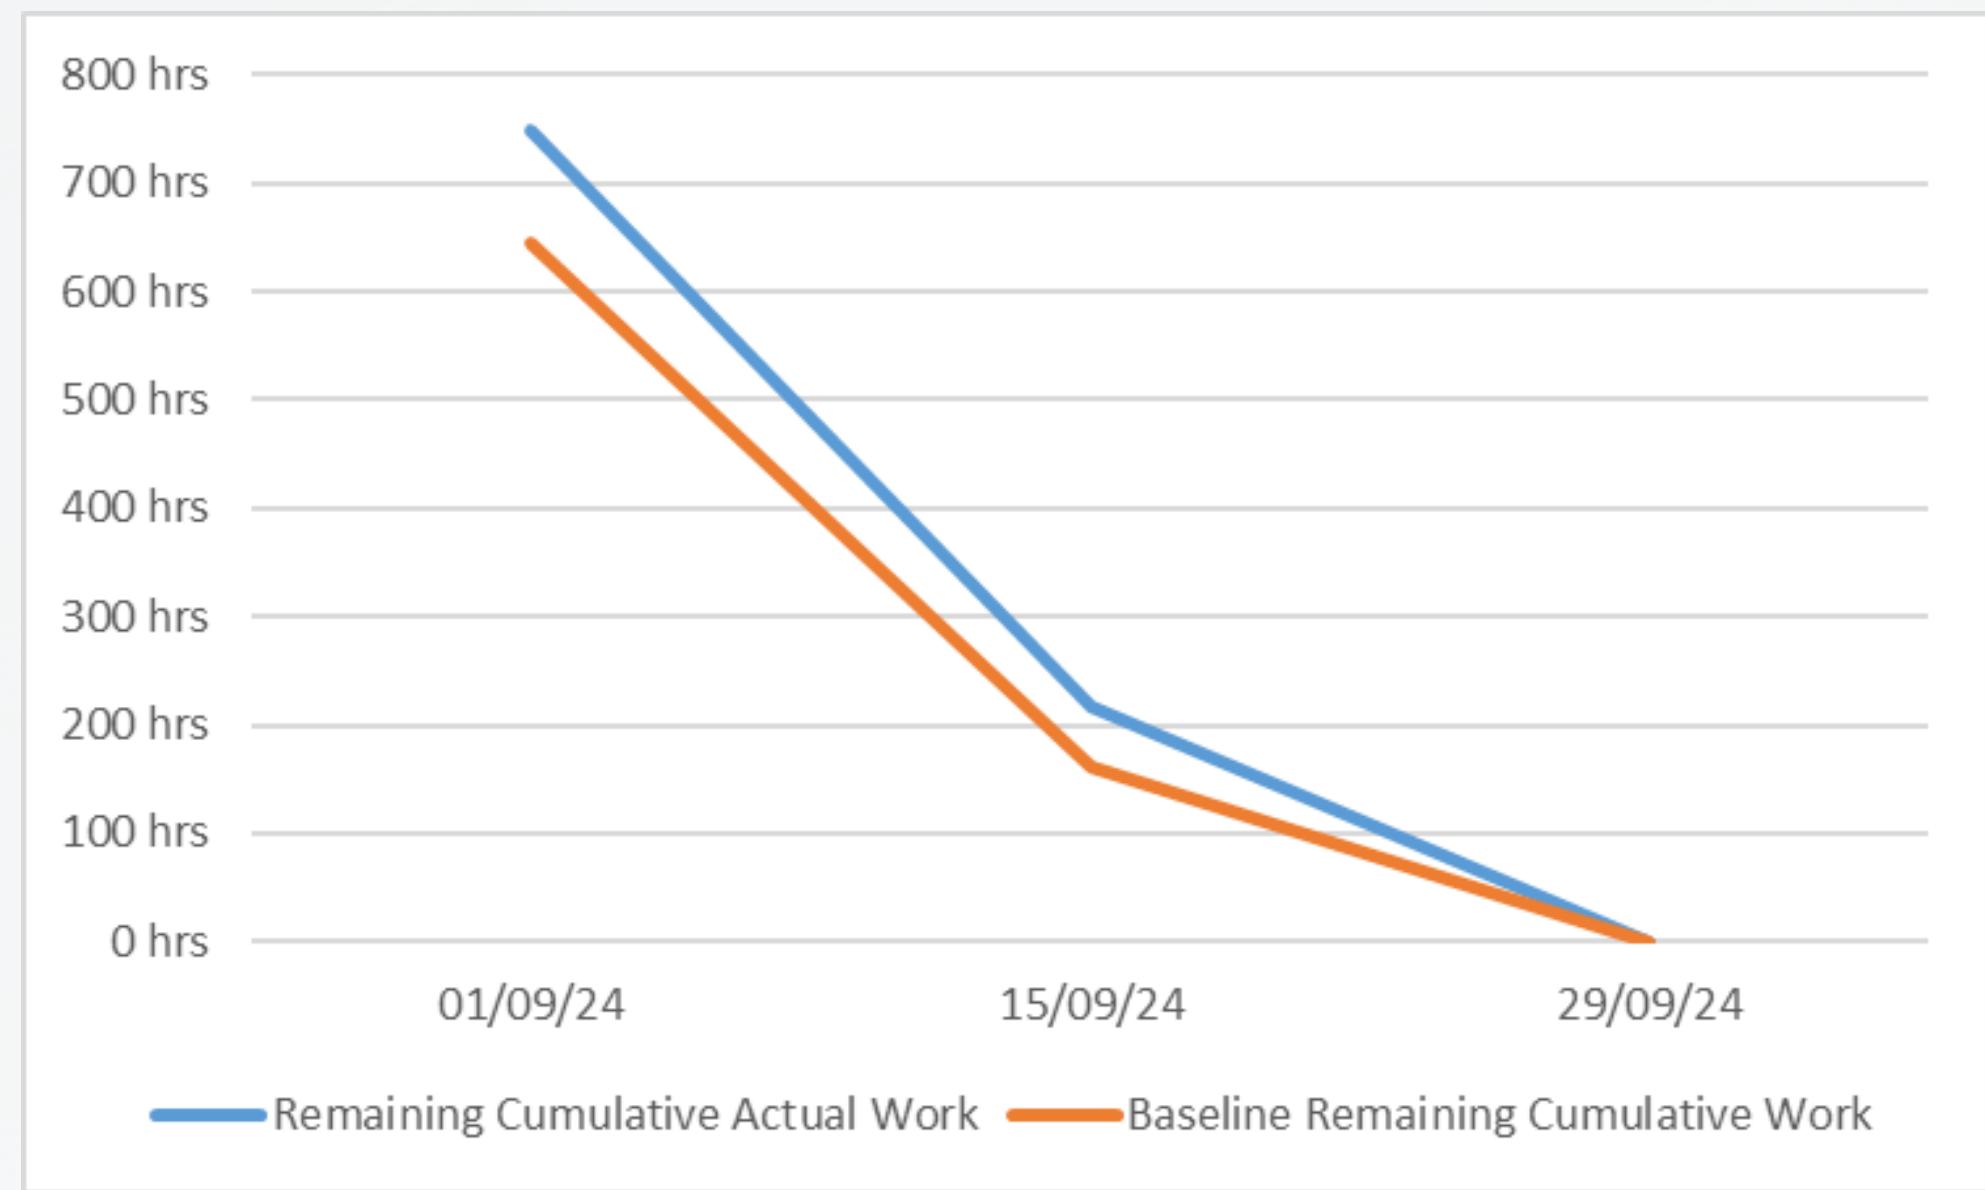

# EARNED VALUE ANALYSIS (SUMMARY)

Metric	Value	Comment
Planned Value (PV)	EGP 395,625.14	Expected cost for Sprint 1.
Earned Value (EV)	EGP 374,843.89	Reflects work completed (~95% of PV).
Actual Cost (AC)	EGP 430,875.02	Actual cost incurred for completed work.
Cost Variance (CV)	- EGP 56,031.13	Over budget.
Schedule Variance (SV)	- EGP 20,781.25	Slightly behind the planned schedule.
CPI	0.87	Cost performance is slightly below expectations.
SPI	0.95	Schedule performance is close to plan.

# COST DISTRIBUTION

# BURNDOWN CHART

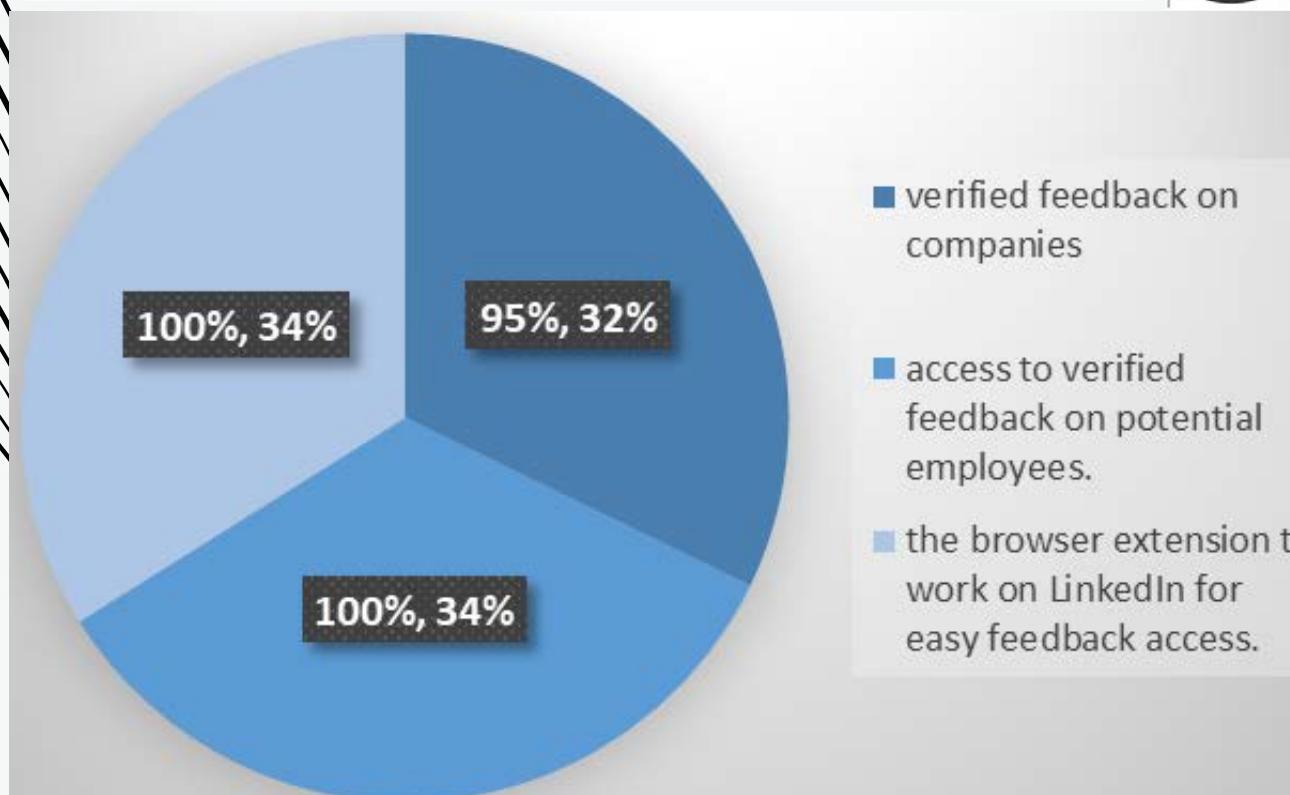

# SPRINT REVIEW

## COMPLETED USER STORIES

- Verified feedback on companies - 95%
- access to verified feedback on potential employees - 100%.
- the browser extension to work on LinkedIn for easy feedback access - 100%.

## KEY SUCCESSES:

- Access to Verified Feedback on Employees and the Browser Extension for LinkedIn were fully completed and tested.

## CHALLENGES

- The Verified Feedback on Companies story was only 70% completed due to complexity in integrating verified feedback data from multiple sources.

# RETROSPECTIVE SUMMARY

## WHAT WENT WELL?

- 95% completion of planned story points, with the Browser Extension and Employee Feedback features delivered as scheduled.

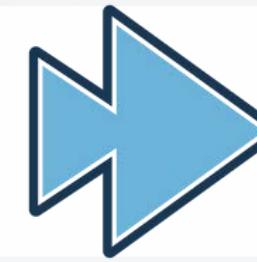

## WHAT COULD BE IMPROVED?

- More time should be allocated to complex features like Verified Feedback on Companies, especially in areas requiring data integration from multiple sources.

# NEXT STEPS

## OUTSTANDING WORK FOR SPRINT 1:

- Complete the remaining 5% of the Verified Feedback on Companies user story.

## PREPARATION FOR SPRINT 2:

- Refocus resources on delivering User Profile Management and Dashboard Analytics.
- Carry over the unfinished portion of the Verified Feedback on Companies feature into Sprint 2 and address the integration challenges early.

# UPDATED BACKLOG

Priority	User Story	Description	Acceptance Criteria	Effort Estimate (Story Points)	Notes/Dependencies
High	As a user, I want to see verified feedback on companies so that I can make informed decisions.	Display detailed feedback on company culture, work environment, and employee satisfaction.	- Verified feedback is visible. - Feedback validated from multiple sources.	3 Story Points	Requires feedback collection and verification system.
Medium	As a company, I want a dashboard with feedback analytics to track my company's reputation.
